

Lisa Tobias

TOBIAS DESIGN LLC

The dream of designing soon became a reality for Lisa Tobias who gave up a successful career as an actuarial consultant in New York and formed Tobias Design located in Hopewell borough over 10 years ago. Lisa and her staff provide clients with her combined skill set of analytics, creativity and a natural people-person disposition, offering clients a seamless process for renovating their kitchen or bath, which can be a daunting task to most people.

Lisa lends a creative eye that combines style with function in the most cost-effective way. Through the design process she gets to know your likes and dislikes, what works and what doesn't, so she can help achieve a style that fits you perfectly. When it comes time to select cabinetry, flooring, countertops, lighting, and appliances, she's there to advise you on what is going to look, feel, and function the best. Cabinetry styles range from traditional to modern from quality lines by Bentwood Luxury Kitchens, SieMatic, Artcraft Kitchens and Greenfield Cabinetry. Lisa has worked on unique projects including designing kitchens for many historic homes, complete makeovers of both small and grand spaces including not only kitchens and baths, but media rooms, mud rooms and home offices, all while working with various styles and budgets.

Lisa has built a solid reputation serving clients in Princeton/Central New Jersey and Bucks County; however clients from Red Bank, Florida, New York, Delaware and Wisconsin have sought out her design expertise and the quality products that Tobias Design offers. Lisa takes great pride in her work which reflects in the thorough process she follows for every project and personal attention to detail that is so important to her.
